Report on Campus Vigilance and Clean Campus Monitoring Drive

As part of its commitment to maintaining a safe, secure, and student-friendly academic environment, the Internal Quality Assurance Cell (IQAC) of Shri Kuleshwar Mahadev Government College, Gobra Nawapara, conducted a campus vigilance and monitoring drive on **04 July 2026**.

The **IQAC team** led by IQAC coordinator **Dr. Premendra Kumar Upadhyay** undertook a comprehensive inspection of various parts of the college campus, paying special attention to areas covered by dense tree canopies and secluded spaces that could potentially be misused by anti-social elements. During the visit, the team observed certain locations where unauthorized persons might take advantage of the thick vegetation and relative isolation to engage in undesirable activities.

The members interacted with the concerned staff and emphasized the importance of regular monitoring of such areas. The need for maintaining cleanliness, improving visibility in densely shaded locations through periodic pruning of trees and bushes, and strengthening vigilance across the campus was also discussed. The drive aimed to create awareness among all

stakeholders regarding their collective responsibility in preserving the safety, discipline, and academic atmosphere of the institution.

The Principal **Dr. Madhurani Shukla** appreciated the initiative taken by the IQAC and encouraged periodic campus inspections to ensure that the college remains a secure and conducive place for teaching, learning, and holistic development.

Outcome:

- Sensitive and isolated areas of the campus were identified for regular monitoring.
- Greater emphasis was placed on campus safety, discipline, and cleanliness.
- Recommendations were made for periodic pruning of overgrown vegetation and enhanced surveillance to discourage unauthorized activities.
- The initiative reinforced the institution's commitment to providing a safe and positive learning environment for all.
